Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 13-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant fails to disclose or reasonably teach a lifting arm that rotationally or rotatable mounted to the main body. In page 11, lines 1, applicant discloses that the retractor arm 12 may rotate around a hinge and that is the only mention of the word "rotate" in the specification. Therefore only the retractor can rotate not the lifting arm. Thus, applicant fails to describe in the specification subject matter in the claim(s) in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Allowable Subject Matter

Claims 40-54 are allowed.

Response to Amendment

Applicant's arguments with respect to claims 13-38 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

A shortened statutory period for reply to this action is set to expire THREE MONTHS from the mailing date of this action.
